Abstract (en)  
[origin: WO2013087941A1] The present invention relates to a watch (1), comprising: a casing including a casing middle (2) forming a transparent central region (15); a first display arranged on a first surface (3) side, and a second display arranged on a second surface (4) side, said second surface being opposite the first surface (3); at least two transparent mobile indicator bodies (5) pivotably and vertically arranged in the central region (15), each mobile indicator body (5) including at least one indicator (7); a drive member (6) completely accommodated within the casing middle (2) and rotating each mobile indicator body (5) at the periphery thereof; and a support means (10) completely accommodated within the middle (2) of the watch, and capable of keeping each mobile indicator body (5) at the periphery thereof in a position substantially perpendicular to the rotational axis of said middle such that the drive member (6) and the support means (10) are outside the central region (15) and such that at least one indicator (7) from each mobile indicator body (5) is visible on the first surface (3) so as to form the first display, and visible on the second surface (4) so as to form the second display.
