Abstract (en)  
[origin: WO2013088095A1] The method of communication between terminals comprises: a step (105) of discovery between the terminals (13, 16), - a step (115) of broadcasting by one of the terminals, termed the "first" terminal (13), of a televisual programme, - a step (115) of displaying, by said first terminal, an item of information representative of a first additional stream associated with said televisual programme, - a step (120) of transmitting, by the first terminal to a second terminal, an item of information representative of a second additional stream associated with said televisual programme - a step (125) of access to a remote application, by the second terminal (16) and - a step (125) of displaying by the said second terminal, in a user interface of said application, messages representative of the second additional stream. In embodiments, in the course of the transmission step (120), the item of information representative of the second additional stream is emitted on a multipoint network.
