Abstract (en)

[origin: US2014306444A1] A catch device (1) for connecting a handle to a vacuum cleaner suction pipe (2), the catch device (1) being mountable on one end region of a vacuum cleaner suction pipe (2), and having at least one sleeve (3), at least one lever button (4) and at least one reset spring (7), the lever button (4) having a catch projection (8) and a pivot axle (9) for the lever button. The catch device (1) reduces the effort for mounting on a vacuum cleaner suction pipe (2) the provision of a clamp element (11) that is positively connected to the sleeve (3), the pivot axle (9) being pivotally held between the clamp element (11) and the sleeve (3).
