Abstract (en)

[origin: EP2792477A1] Corrugation device (1) for sheets of paper material (10) comprising two corrugation cylinders (21, 22) having work surfaces (21 b, 22b) suitable to substantially engage reciprocally so as to define a deformation zone (20a) and impress a deformation force on sheets of paper material (10) and at least one thrust member (30) suitable to define a working configuration in which it exerts on one of the work surfaces (21 b, 22b) an additional pressure able to vary the deformation force and a rest configuration in which it does not exert the additional pressure.
