Abstract (en)  
A machine for packaging pallets, comprising: a frame (2); a supply device (3), predisposed to remove a section of tubular film from a store (M); a cutting and welding device (4), predisposed to cut and weld at a determined section of the tubular film; a positioning device (5), vertically mobile, which is predisposed to grip the section of tubular film at one end and to fit the section of film onto a pile of articles. The cutting and welding device (4) is vertically mobile, while the supply device (3) is arranged in a fixed position in an upper zone of the frame (2), above the cutting and welding device (4) and the positioning device (5).
