Abstract (en)

[origin: WO2013092851A1] A rice protein hydrolysate obtainable by a process in which a rice protein source is enzymatically hydrolyzed with an enzyme with endoprotease and/or exoprotease activity, and let it act under constant temperature and pH. The rice protein hydrolyzate is useful in the treatment and prevention of obesity. The invention also relates to edible compositions, nutritional compositions and pharmaceutical compositions including the rice protein hydrolysates.
