Abstract (en)

[origin: WO2013095129A1] The present invention relates to a beer glass and a method for tapping beer, comprising a substantially cylindrical container (A) for beer, wherein the cylinder shape defines two end surfaces, wherein the container (A) comprises an opened side (C) on one end surface and a closed side (E) on one other end surface, wherein the end surface on the closed side (E) is adapted to support the beer glass (A) on a support surface, and at least a part of the periphery of the opened side (C) extends in a plane at an angle less than 3 degrees relative to the support surface. The invention also relates to a method for tapping beer into the new beer glass.
