Abstract (en)

[origin: WO2013093526A1] Controls for Heated Liquid Vessels and Electrical Appliances A substantially 360° cordless electrical connection system for connecting an appliance to a power base, the system comprising a plug connector (3) and a corresponding socket connector (4), the plug connector (3) comprising a substantially central plug (530) conductor for electrical connection to a corresponding socket conductor (137L) within a substantially central socket (64) in the socket connector (4), the plug connector (3) further comprising at least second and third conductors (127, 534N) located outwardly of the substantially central plug conductor (530) each at a different radial distance from the substantially central plug conductor (530), for electrical connection to corresponding conductors (137,N, 137N) in the socket connector (4).
