Abstract (en)

[origin: US2013153597A1] A container for storing wipes is disclosed. The container for storing wipes includes a container base including a front wall, a back wall, a top wall, and a bottom wall defining an interior cavity for storage of a stack of wipes. The container includes a dispensing panel having a dispensing partition formed therethrough. Within the interior cavity of the container, a support portion is positioned for support of the bottom of the stack of wipes. The support portion forms a support portion angle between about 100 and about 115 degrees with the bottom wall. A container designed as described places the wipes stack in a vertical position thus reducing the footprint should the dispenser be placed on a toilet tank or countertop. Furthermore, the wipes being placed in a vertical position allows for more versatile and durable wall-mounting options while providing adequate dispensing performance.
