Abstract (en)  
[origin: WO2013092879A1] The invention relates to an assembly (1) consisting of at least one preform (12) and a decontamination device (10) for decontaminating the interior of a preform (12) by irradiation by means of at least one ultraviolet radiation emitted by semi-conductor components (22); relates to a facility (100) for producing a sterile container (120) comprising at least one decontamination device (10) and a method for producing a sterile container (120) from a decontaminated preform (12).
