Abstract (en)
[origin: WO2013092027A2] The invention relates to a power tool, especially an angle grinder, comprising at least one grip housing (14) having at least one handle-shaped grip region (16), and at least one switching unit (18) having at least one movably mounted latch element (20). According to the invention, the latch element (20) has a maximum width (22) that extends over at least the major part of at least one maximum width (24) of the handle-shaped grip region (16) of the grip housing (14).
