Abstract (en)  
[origin: WO2013092137A1] The invention relates to a device (100) for driving fastening elements (110) into a substrate, having a receptacle (120) for a fastening element, having a driving-in element (130) which drives a fastening element in the receptacle into the substrate, having a first or second transport element (210) which can be brought into engagement with a fastening element or a strip comprising a fastening element in order to transport the fastening element in a transporting direction into the receptacle, and having a catch (270) which has a blocking position and an enabling position, wherein the catch blocks a transporting movement of the fastening element, and in particular of the first or second transport element, in the blocking position and enables this in the enabling position.
