Abstract (en)
[origin: CA2860358A1] Disclosed is a strapping apparatus for strapping a tensioning strap around a packaging item, comprising a frictional wheel (4) that operates against a support (5) to tighten the tensioning strap. The frictional wheel (4) is operatively connected to a drive unit (12) and can be lifted from the support (5) by a swiveling lever (9). The disclosed strapping apparatus is characterized in that the swiveling lever (9) includes an interrupting element (11) to interrupt the path of action between the frictional wheel (4) and the drive unit (12) so as to be able to lift the frictional wheel (4) in an unloaded state from the tensioning strap.
