Abstract (en)

[origin: WO2013091796A1] In the production of packs (10) having an outer wrapping of sealable and shrinkable film, the packs (10) run individually and spaced apart from one another cyclically through several processing stations for sealing and/or shrinking. In an assembly station (40), units consisting of several, in particular four, packs (10) are combined into a functional unit and thereafter transported in a corresponding conveying cycle and processed simultaneously in the region of work stations.
