Abstract (en)
[origin: EP2607288A1] The arrangement (1) has a sliding guide shoe (4) moved along on a guide rail for guiding a lift car, where the guide rail is formed as a T-section. A damper unit (5) and the sliding guide shoe together form a structural unit, and are fastened on a common carrier (22), which is fastened on the lift car. The damper unit is integrated in the guide shoe by attaching sliding surface (16) of the guide shoe to respective guide surfaces of the guide rail. The damper unit has a control device (6) provided as a part of the structural unit by fastening to the common carrier.
