Abstract (en)

[origin: WO2013091601A2] The present invention relates to a process for producing a superhydrophobic coating having self-cleaning properties on a metallic substrate, a metallic substrate having a superhydrophobic coating and self-cleaning properties which can be obtained by such a process, the use of an electrolyte solution comprising ammonium sulphate and ammonium fluoride for producing a superhydrophobic coating having self-cleaning properties on a metallic substrate and also the use of a metallic substrate for protection against icing in an aircraft or for protection against soiling and/or erosion in an aircraft.
