Abstract (en)
[origin: WO2013092400A1] The invention relates to a household appliance with a treatment container (1) for receiving objects to be treated, a storage container (32) for an aqueous fluid (6), at least one pump (22, 35) for conveying the aqueous fluid (6) between the storage container (32) and the treatment container (1), an oxidising agent generator (20) and at least one Venturi nozzle (16, 26), wherein a first Venturi nozzle (16) is arranged between the treatment container (1) and the storage container (32) and is connected to the oxidising agent generator (20), and the storage container (32) is connected to the treatment container (1) via a first air channel (38), which can be controlled with a valve (39). The invention further relates to a method for operating said household appliance.
