Abstract (en)
[origin: WO2013095104A1] Dumping vessel for dumping sinking particles like sand, blocks, rocks or stones onto the bottom of a lake or sea, comprising a floating hull and a fall pipe pending downwards towards the bottom, wherein the fall pipe comprises a lower dumping section, at least two hoisting cables that connect the dumping section with the hull, and a series of fall pipe sections between the hoisting cables that are stacked onto each other on the dumping section, wherein multiple fall pipe sections each comprise a tube and an upper connector and a lower connector at the ends of the tube, wherein the upper connector and the lower connector of subsequent fall pipe sections engage each other, wherein these fall pipe sections comprise at the upper connector a closure for confinement of one of the hoisting cables.
