Abstract (en)

[origin: WO2013093193A1] The object of the invention is a fastening element (10) arranged in a concrete shell structure, which concrete shell structure comprises an outer shell (1) and an inner shell (2) and a first thermal insulator (4) arranged between them, and which fastening element (10) is arranged to interconnect the outer shell (1) and the inner shell (2) such that loads imposed on the outer shell (1) at least partly will be transferred to the inner shell (2) and which fastening element (10) comprises at least one second thermal insulator (4) separate from the first thermal insulator (3).
