Abstract (en)

[origin: WO2013092297A1] A device (100, 200, 300) for transmitting electrical energy and/or electric signals from a fixed wall to a swivellable element fastened on the wall such that it can be hinged about a hinge pin (S), having a wall part (1, 101; 2), which can be fastened on the wall, having a swivellable-element part (6, 106, 206), which can be fastened on the swivellable element, and having an energy and/or signal transmitter (8, 21), which comprises a wall-transmitter part (9, 22), provided in the wall part (1, 101; 2), and a swivelable-element-transmitter part (10, 23), provided in the swivellable-element part (6), wherein at least one of the transmitter parts is arranged such that it can be displaced in the direction of the hinge pin (S), characterized by the provision of an optionally actuatable displacement drive (26, 126, 226) which is operatively connected to the at least one transmitter part.
