Abstract (en)

[origin: WO2013095127A1] The invention relates to a door stop having fastening elements for fastening the door stop (1) to a frame (2), and a first damping device (7) for slowing down a door (3) which moves towards the door stop (1) during operation after said door reaches a first receiving distance (l1). The door stop (1) further has a second damping device (6) for receiving the moving door (3) after it reaches a second receiving distance (l2), wherein the second receiving distance (l2) is smaller than the first receiving distance (l1).
