Abstract (en)
[origin: WO2013092102A1] Spacer (1) for a thermal flowmeter, having a flat supporting surface (2) for a thin-film resistance thermometer and an otherwise circular cylindrical lateral surface (7), wherein the supporting surface (2) is inclined with respect to a longitudinal axis (6) of the spacer (1). The spacer preferably has two walls delimiting a first width (4) of this supporting surface (2), wherein the first width (4) of the supporting surface (2) is less than a second width (5) of the supporting surface.
