Abstract (en)

[origin: WO2013091814A2] The invention relates to the field of controlling medical treatment devices, in particular dialysis equipment. The aim of the invention is to make the control of medical treatment devices more flexible and more convenient and to extend the possibility of programming and outputting individual handling instructions. Said aim is achieved in that individual front ends are available for the treatment and for the medical treatment device, which front ends said create a phase list on external equipment that controls the medical treatment device and is transferred to the medical treatment device.
