Abstract (en)
[origin: EP2608115A1] The card (1) has an integrated circuit chip (2) integrated with a smart card body (4) with a form factor e.g. 2 or 3FF, and a tab (6) attached to the card body, where the tab is detached from the card body. Another smart card body (8) has a form factor e.g. 4FF, that is larger than the form factor of the former card body. The latter smart card body comprises a contour (7) and a slot (9) i.e. cavity, to accommodate the former smart card body. The latter card body is attached to and detached from the tab. The contour has thickness greater than that of the tab and that of the former card body.
