Abstract (en)
A window covering (100) includes a headrail (10), a bottom rail (20), a shading member (30), two pulley assemblies (40), and a cord (50, 55, 56, 57, 58). The shading member (30) is between the headrail (10) and the bottom rail (20). The pulley assemblies (40) are received in the headrail (10), each of which has a frame (42) and a pulley (44). The frame (42) has an opening (42c), and the pulley (44) is connected to the frame (42). The cord (50, 55, 56, 57, 58) is a woven Y-shaped cord, having a single control section (52, 554, 564, 582) and two lift sections (54, 552, 556, 574, 584). The cord (50, 55, 56, 57, 58) runs over the pulleys (44) of the pulley assemblies (40), the single control section (52, 554, 564, 582) extends out of the headrail (10) to be operated by a user, and the lift sections (54, 552, 556, 574, 584) extend out of the headrail (10) respectively to connect to the bottom rail (20) through the shading member (30).
