Abstract (en)  
[origin: CA2899548A1] The invention relates to a linkage system for fireproof ceramic bricks for forming an arch-like support structure. According to the invention, the bricks have two interlocking elements in the X- and Y-directions which at the same time stabilize the linkage in the Z-direction. This makes it possible to easily arrange the bricks with continuous linkage in the X- and Y-directions but also in the Z-direction of the coordinate system.

Abstract (de)  
Die Erfindung betrifft ein Verbundsystem von feuerfesten keramischen Steinen zur Ausbildung einer gewölbartigen Tragkonstruktion. Die Verbindung benachbarter Steine erfolgt über korrespondierende Profilierungen an den Aussenflächen der Steine in X- und Y-Richtung, wodurch es möglich ist, alle Steine innerhalb einer Lage, d.h. nebeneinander in X-Richtung und hintereinander in Y-Richtung, formschlüssig zu einer Tragkonstruktion anzuordnen. Daraus ergibt sich unmittelbar eine Stabilisierung der gesamten Tragkonstruktion.
