Abstract (en)
[origin: US2014311326A1] Armor panel comprising an aluminium alloy plate wherein: a) said aluminium alloy has the following chemical composition expressed in percentages per weight: 5.1% \pm 0.2% Zn \pm 0.15% 1.5% \pm 0.2% Mg \pm 0.1% 1.2% \pm 0.1% Cu \pm 0.1% Si \pm 0.4% Fe \pm 0.5% Mn \pm 0.3% Cr \pm 0.28% Ti \pm 0.2% Zr \pm 0.15% b) said plate comprises a face oriented towards the shocks and a face opposite said face oriented towards the shocks coated with a composite reinforcing layer comprising reinforcing fibres or bands with high ballistic protection performance, typically made of high mechanical performance glass, aramid or high performance polyethylene.
