Abstract (en)

[origin: US2014313869A1] A horology component (14) comprising an opening (140) intended to house a member (13) by the latter being driven into the opening, the component comprising at least one housing structure (15) for housing the member, each housing structure comprising: a housing element (16) intended to come into contact with the member, a connecting element (17), an elastically deformable element (18), the housing element being mounted on the elastically deformable element via the connecting element.

Abstract (fr)

Composant horloger (14) comprenant une ouverture (140) destinée à recevoir un organe (13) par chassage de ce dernier dans l'ouverture, le composant comprenant au moins une structure de réception (15) de l'organe, chaque structure de réception comprenant : - un élément de réception (16) destiné à venir en contact avec l'organe, - un élément de liaison (17), - un élément élastiquement déformable (18), l'élément de réception étant monté sur l'élément élastiquement déformable via l'élément de liaison..
