Abstract (en)

[origin: EP2796979A1] A method for adjusting a graphical object (114) according to operator preference is provided. The method includes: rendering a graphical object on a display screen (112) of a handheld device (100); determining a preference setting indicating one of a left-handed preference or a right-handed preference for operating the handheld device (100); and adjusting the graphical object (114) according to the preference setting.
