Abstract (en)  
[origin: WO2013098353A1] An apparatus for supplying a continuous web of crimped sheet material (2) to a rod forming device comprises: - a winding unit (3) for unwinding the sheet material from a bobbin (21) on which the sheet material is provided; - a crimping unit (7) for crimping the sheet material, - a cutting unit (5) for cutting the continuous web of sheet material (2) to a predetermined width, the cutting unit (5) being arranged upstream of the crimping unit (7) when viewed in the direction of transport of the sheet material (2); and- a control unit (9) for controlling the various units of the apparatus in response to sensor signals received from the respective units.
