Abstract (en)
[origin: WO2013117554A1] The invention relates to an applicator device for applying wrapping labels (13) to packagings (15), having a transverse transport device (19) which is configured for transporting a label, which is first of all dispensed by a label dispenser, in particular a label printer (11), in the vertical direction into an intermediate position, from the intermediate position transversely with respect to the vertical into an application position, in which the label can be received by a packaging which is running through.
