Abstract (en)

[origin: WO2013097009A1] The present can comprises a tubular body (C) formed by lateral walls (10) of rectangular contour and which are connected, two by two, by longitudinal edges (13), said tubular body (C) being closed by an upper wall (11) and a lower wall (12). Each lateral wall (10) incorporates a structural reinforcing means defined by a plurality of depressions (50, 60) having a polygonal or circular contour and located side by side, without overlapping and occupying at least one portion of the area of each lateral wall (10).
