Abstract (en)
[origin: WO2013098010A1] The present invention relates to a cooker (1) comprising a cooktop (2) which is produced from glass or ceramic, more than one burner (3) that provides the flames to reach the container wherein the cooking process is performed, more than one burner connection member (4) that is fixed onto the cooktop (2) so as to remain between the cooktop (2) and the burner (3) and that carries the burner (3) placed thereon, and at least one grill (7) that has a frame (5) that is seated onto the cooktop (2) so as to surround the burner connection member (4) and more than one arm (6) that extends from the frame (5) over the burner (3) such that the burner (3) remains therebetween and thus, that forms a surface whereon the containers such as pot and pan, placed thereon, are seated.
