Abstract (en)

[origin: WO2013098041A1] The present invention relates to an oven (1) which can be easily produced and wherein energy saving is provided by heat insulation. The oven (1) of the present invention comprises the insulating board (4) having two opposite edges (K1, K2) joined by being wrapped around the base unit (3). The oven further comprises at least two holders (5, 105), disposed on the base unit (3), one of which is mounted to one edge (K1) of the insulating board (4) and the other to the other edge (K2) of the insulating board (4) by extending from the base unit (3) to the insulating board (4) and which provide the two opposite edges (K1, K2) of the insulating board (4) to be joined without a gap remaining therebetween by being fastened to each other.
