Abstract (en)
[origin: WO2013098383A1] The invention relates to an electric connection device (10) comprising a housing (1) with a conductor connection device (2) for connecting an electric cable (3) which has an inner conductor (3a) and a concentric outer conductor (3b). According to the invention, the conductor connection device is designed as a cable connection socket (2), said cable connection socket (2) having an outer thread (4) for producing a threaded connection to a counter thread (6) which corresponds to the outer thread (4) and which is formed in a thread bore (5) of the housing (1). The cable connection socket (2) is designed with an inner bore (7) which corresponds to the diameter of the outer conductor (3a) in order to be pushed onto the outer conductor (3a), and an inner conductor pin (8) is provided which is connected to the end of the inner conductor (3a).
