Abstract (en)

[origin: CN204061446U] The utility model relates to a positioning mechanism for a telescopic rod. The positioning mechanism is used for housework tools or garden tools. The telescopic rod is provided with a positioning device with a clamping component, and telescopic rod pipe fittings can be mutually fixed through the positioning device. The positioning mechanism can reliably bear force applied on the clamping component, and a supporting portion is arranged on the positioning mechanism and used for circumferentially and/or axially supporting the clamping component.
