Abstract (en)  
[origin: EP2799367A1] A package-type carrier, wherein a packaged object that is a biosensor can be easily taken out of the package-type carrier and attached to a measuring device without touching the packaged object. A package-type carrier (10) has an unsealed portion (15) outside a sealed portion (12) and near a connection electrode of a biosensor (16), and has, at the end of or near the unsealed portion (15), a leading end processed portion (14) such that a space (18) is provided in a portion between an upper cover (11a) and a lower cover (11b) of the package-type carrier (10).
