Abstract (en)

A panel (1, 2) made of an insulating material, adapted to be positioned, by means of gluing or mechanical fixing, on building structures, so as to obtain an external insulation system. Said panel comprises on at least two of the sides (12) defining the thickness of the panel itself, portions provided with a plurality of protuberances, which define, between one another, as many seats, adapted to house similar protuberances of another panel of the same type, which has to be coupled to the first panel, so as to coat said building structure.
