Abstract (en)
[origin: WO2013102676A1] The present invention relates to a structural clay tile for facing and/or constructing room enclosures, the structural clay tile having a cuboid form with a length, a width and a thickness, the thickness being smaller than the length and the width, and the structural clay tile having a cell structure (1) with a plurality of juxtaposed cells (2) the cell walls of which extend at least in the direction of thickness and are filled with a clay material. The invention further relates to a method for producing a structural clay tile, a cell structure (1) having a plurality of juxtaposed cells being provided, into which cells the clay is filled and allowed to harden.
