Abstract (en)

[origin: WO2013105050A1] The present disclosure relates to a personal protection device (10) for the protection of a portion of the body of a user. The device comprises an inflatable element (12) intended to protect at least partially a region of the pelvis of the user and including a first side protection portion (13) intended to protect at least one hip region, and a second side protection portion (14) intended to protect at least the other region of the hip of the user, and a connecting portion (16) defining a zone of connection between the first side protection portion (13) and the second side protection portion (14). The connecting portion (16) defines a fluid communication between the first side protection portion (13) and the second side protection portion (14).
