Abstract (en)

[origin: WO2013104662A1] In the case of a method for producing a film-severing cut (8a-8f) on a film (3) of a film-coated metal sheet (1) by means of a film-severing tool (20; 30) which, with a tool tip (22; 31) resting on the metal sheet (2), is moved along a predetermined curve and produces the film-severing cut (8a-8j) mechanically in the process by displacing film material, the film-severing cut (8a-8j), according to the invention, has at least one acute-angled point (9a-9j) so as to form at least one film corner (7a-7j) detached from the metal sheet (2).
