Abstract (en)

[origin: WO2013104451A1] The invention relates to a method for operating a vehicle, wherein a database (403) comprising reference route data assigned to the current travel route is interrogated (101) on the basis of a current travel route of the vehicle to see whether the current travel route exhibits a change with respect to a feature of the travel route, and wherein a response from the database (403) corresponding to the interrogation is provided (103). The invention further relates to a corresponding apparatus (301), to a system (401), and to a computer program.
