Abstract (en)
[origin: EP2803295A1] A composite chair includes a stationary seat (1) and a movable portion (2) installed on the stationary seat (1). The stationary seat (1) includes at least one first carrying portion (11) and two first tracks (12). The movable portion (2) includes a second carrying portion (21) and a linkage mechanism (22) connected to the stationary seat (1) and second carrying portion (21) to allow the second carrying portion (21) to proceed a lift movement against the stationary seat (1). The second carrying portion (21) includes two second tracks (211). The linkage mechanism (22) includes two first linkage bars (23) and two second linkage bars (24). Through the first and second linkage bars (23, 24) sliding in the first and second tracks (12, 211), the second carrying portion (21) can be lifted and switched to become a tabletop or a seat.
