Abstract (en)

Kinematic system for treating, rehabilitating and sports training of the spine and thorax muscles of the human body is equipped with a rotary seat (5), which is connected with the rotary arm(s) (4) by the means of a backward mechanism (2). Said backward unit comprises two rotary backward elements (15, 15a, 15b, and 17, 17a, 17b) connected with the elements of transmission (16, 16a, 16b, 16c, 16d). Additionally along the axis at the top of the mechanism there is a off-load frame (8) used for suspending the user of this mechanism.
