Abstract (en)
The present invention relates to, on the one hand, a roller container (1) for transporting and storing loose goods, comprising a front wall (4) provided with a hook assembly (10) for pulling the container (1) onto and off a lorry, in which said hook assembly (10) comprises two supporting plates (11a; 11b), each of which is provided with an opening for accommodating an end of a hook member (12), a rectangular box profile (13) being provided as buffer element between said supporting plates (11a; 11b) and as connecting element between the two said supporting plates. On the other hand, the present invention relates to a method for producing such a container (1).
