Abstract (en)

[origin: WO2012098082A1] The invention relates to an interactive display device (200) for a golf vehicle (100), comprising: at least one display screen (201), image capture means (207), position and orientation determination means (208), means for securing same to a golf vehicle, a database of stationary or moving elements linked to the position and orientation parameters, and means for the simultaneous display on the screen of captured images and elements from the database relating to an identical position and orientation, with an error approximate thereto of a pre-determined value. Optionally, the invention can include means (214) for the remote transmission of images captured by the image capture means and means for remotely controlling the image capture means.
