Abstract (en)
[origin: WO2013107440A2] The invention relates to a hose guiding device in which a hose (203) that is filled with a gaseous medium is guided through a liquid (201) in horizontal sections. The horizontal sections are supported on a gripping device. The movement of the gripping device is transmitted to a sprocket (214) via chains (207) in order to introduce or discharge the kinetic energy.
