Abstract (en)
[origin: WO2013109286A1] A gasket insertion apparatus and method for inserting a gasket between the adjoining faces of a flange assembly are provided. The gasket insertion apparatus includes a frame, a member and a wire. The frame has a first end, a second end and an inner gripping surface. The first and second ends have guides. The member has a first end portion attached to the frame and a second portion extending away from the frame. The wire is anchored to at least one of the frame and the member such that it movably adjusts within the guides and secures the gasket within the inner gripping surface.
