Abstract (en)
[origin: WO2013107705A2] A damp-proof luminaire has LEDs (2) forming a light source for the damp-proof luminaire, a support element (3) on which the LEDs (2) are mounted, and a light-permeable cover (5). The LEDs (2) are arranged in such a way that light generated by the LEDs (2) can radiate into a space outside the damp-proof luminaire through the cover (5). An adhesive and sealing element (6) is designed and arranged in such a way as to have an adhesive and sealing effect between the cover (5) and the support element (3).
