Abstract (en)
[origin: EP2805641A1] The present invention relates to a multifunctional hairdressing workstation, said workstation comprising a tubular structure (1) suspended by the upper end (1a) thereof, with an air inlet (2) close to the upper end (1a) and an air outlet (3) at a lower end (1b), at least one turbine (4) actuated by an electric motor (5) inside the tubular structure (1) for impelling air from the air inlet (2) to the air outlet (3) through an electric heating element (6), and a hose (7) connected to the air outlet (3) and ending in an outlet section (7b) that may be handled manually so that it can be placed in various positions in relation to an individual's hair. The tubular structure (1) includes support means (22) arranged to support one or more auxiliary tools and at least one electric socket (8) configured for the connection of an auxiliary electric tool (X).
